Whole Foods Market - July 3rd, 2013

Completed approximately ~95% of planned tasks for sprint

- Remaining tasks will shift to the backlog for iteration 3
 - Updating solution design
 - Finalizing installation instructions
 - Integrate StatusPage.io in the site
 - Finalize recall details page

- Ideal burndown
- Remaining burndown
- Hours completed

- Conducted a second round of usability testing with user feedback group

Feedback summary for second iteration:

What improved about the application since Round 1?	<ul style="list-style-type: none">• Page responds nicely when resizing in the browser window• Application tour is a great idea• Sharing feature is excellent• Mobile site UI was clean, easy to understand
Could you find what you were looking for?	<ul style="list-style-type: none">• Information was easy to see on the card themselves, with graphics conveying quick and easily registered details of ingredients
What do you think we can improve on?	<ul style="list-style-type: none">• Consistent fonts/text on info pages• Search capability to filter cards down on landing page• Email sharing should be formatted to replace the '+' with spaces• Sharing error message popped up when attempting to share via Facebook (a browser tab opened but nothing happened)• Would like ability to specify location for recall results• "Show comments" link did not work on detail page (mobile)• Filter cards based on classification• Information page has the menu overlapped on the map so it was not easy to see

- Finalize installation instructions
- Integrate StatusPage.io in the site
- Finalize details page
- Add filtering by severity
- Add filtering by keywords
- Verify licenses of all code
- Add instructions on how to obtain API keys
- Turn on HTTPS and point it to total-briecall.com domain
- Finalize RFQ deliverables
 - Finalize Readme write up for submission
 - Finalize wiki page evidence
 - Finalize pricing
